Subject: Fw: PROLIFT + M Registration

Guys,

Despite reinforcing the caveat of unconfirmed accuracy, I want to feedback the concern to receive this feedback particularly as Dr Lucente was an ambassador for the company during his Australian visit and these comments if true are unhelpful to all.

Although I am not aware who owns this relationship, it appears that Dr Lucente may have some concerns that are being voiced via inappropriate channels that are unresolved.

Can I please encourage that we as an organisation work to address any concerns that he has and to reinforce the need to communicate appropriately (while being sensitive to the Australian team who provided the feedback)

Regards

Jonathan Meek

This is via a third person rather than directly to me, basically that he feels J&J don't look after him and appreciate his status in the industry. Apparently there was a conference that he was asked to speak at on short notice and J&J wouldnt pay for his airfare as he was already going there. He feels that his feedback on products is not being listened to as a top KOL and that there are other companies chasing him, offering to look after him at a much higher level.

As to whether or not any of this is true, I don't know however I thought it should be passed on. When he went through his presentations with me he was quite scathing of PROSIMA being a reckless product, TVT Secur as having problems and being behind MINI ARC in terms of reliability. I do know that several comments were made in surgeny (off camera) about TVT Secur, the use of ULTRAPRO for gyne surgery (now there is a can of worms that we didnt need promoted).

This doesnt look like you are on holidays.... Do you want to speak some time next week for a general catch up? I can call you early am our time.

Ros

Thanks for this Ros.
What did Vince say?

Hello!

Arent you on holidays? Lets talk when you are back and a replacement is on the way. At this stage, things here are quite smooth - we had a brilliant roadshow last week with Preceptors, KOLs and locals in VIC. Interestingly, Vince didn't hold back in his disappointment with J&J in the US in terms of "looking after him". Im not sure who owns that relationship but I think he is after some serious TLC.

For the first time this year we are over forecast for a month - tracking at 20% over forecast for April, 36% over prior year. Fingers crossed for a good second quarter.

Sharon was a great marketer just not into compliance and slow turning wheels however I think her impact in three months has been really strong and hopefully that will flow smoothly into our plans for the rest of the year.

Thanks Ros and welcome back.
Sorry to hear about Sharon.
Is there anything that I can do to help over there??

I am still happy to set up a recurrent call with you to assist you settling into the role. Over to you

Hi

A quick note to let you know that the above received TGA registration today. Rather than a full 12 month registration process as anticipated, the TGA downgraded the application from a full Class 3b application to a Class 2b, piggybacking on the back of PROLIFT. This means that we will be able to apply for reimbursement in the next round with anticipation of a Jan '09 launch.

As its a good news story, I just had to share it.

Regards

Ros
